ANNUAL PRICE LIST

NEWER GLADS

Spring 1941

EVERETT CLARK
POQUONOCK, (WINDSOR) CONNECTICUT

FOREWORD

In this my 1941 Catalog I again list the usual time tested and popular varieties and also many new ones. These new varieties have been grown in my fields at least one season to get an idea as to their worth and adaptability to surroundings, for of course, climate and soil, are determining factors to a certain extent. Only such varieties as have proved most likely to be successful thrivers in the average home garden have been retained.

Again I express my thanks to my "glad friends" and ask their continued patronage. Each year indicates that "glads" are still as interesting a hobby as ever as well as a remunerative one. To all I extend my best wishes for "glad raising" in the year 1941.

Terms: Single bulbs or bulblets at the ten rate, but no single item for less than five cents. 25 bulbs or bulblets at the 100 rate; 250 at the 1,000 rate. Pints and half pints in generous measure at the quart rates. Prepaid spring delivery on all orders over \$2.00—except for F. O. B. prices.

Cash, please. With the following extras of your selection: On orders up to \$5.00 you may select 10% in extra bulbs; \$5.00 to \$10.00, 15% in extra bulbs; \$10.00 to \$20.00, 20% in extra bulbs. Over \$20.00, 30% in extras. If you purchase large bulbs only in lots of 25 or more and will call for them or pay express charges, you may take a cash discount of one-third instead of extra bulbs. The above extras and discounts do not apply to F. O. B. quotations. Gratis bulbs for the names of your glad-loving friends.

Stocks of bulbs for 1941 guarantee the same bright, clean, healthy stock as usual.

This year, I have a number of extra large jumbo bulbs. If you wish these bulbs, specify, and send your order in early. The bulbs I prefer to grow myself and will use in filling orders are plump, high crowned stock grown from bulblets or small planting stock. (L) large, (M) medium, and (S) small sizes are those common to the trade. Large bulbs can be depended upon for the finest spikes. Medium sized bulbs will prove very satisfactory. Small bulbs may do well. Varieties in the 40-25-15 range, such as Aflame, Aida, Yvonne, may also be purchased in standard sizes per 100 as follows: No. 2, \$2.40; No. 3, \$2.00; No. 4, \$1.50; No. 5, \$1.00; No. 6, 60c; prepaid delivery.

Gladioli are very easy to grow. Following are a few of the principal rules to follow:

Select a place in the open garden where other tall growing plants will not shade them. Glads like and need full sunshine. Mix with the soil, any good grade of commercial fertilizer or well rotted compost or manure. Select good healthy bulbs. Place them in a trench at least five inches deep and about three inches apart in a straight or staggered row. Cover at once. It is better to plant deeper than too shallow. One or two light applications of fertilizer during the growing season, before buds appear, will help insure good spikes.

Join the Connecticut Gladiolus Society if you live nearby. You will be warmly welcomed by its members. Send the dues of \$2.00 to me and I will be glad to forward them to the Secretary.

SATISFACTION GUARANTEED

Successful control measures include the following:

(1) Treat the bulbs with Cyanogas-G or other fumigant upon cleaning the bulbs in the fall. Small quantities of bulbs may be put in paper bags or shoe boxes and sprinkled with Napthalene flakes — 1 ounce per 100 lbs. Let the flakes evaporate. (2) Store in a cool, dry place and keep at a temperature of 40 degrees. Do not let the bulbs freeze. (3) Treat or soak in a solution of bichloride of mercury (corrosive sublimate) before planting. Husk the bulbs previously, if possible. Soak for two hours in a solution of 1.1000. one tablet to one pint of water. Use stone crocks, glass jars, or wooden tubs—not a metal container. Large numbers of bulbs may be tied in sacks and kneaded on the floor in lieu of husking. Thorough soaking will destroy all thrips and their eggs. (4) Spray every week or ten days after the plants are six inches high. Do not wait until the buds appear. It is too late then. Effective spraying will control those thrips that have survived or that may appear from nearby infestations.

Tartar Emetic, used as follows, has proven very satisfactory in controlling thrips. Tartar Emetic 4½ teaspoonsful, sugar 1 2/3 cups, water 3 gals. Apply late in the afternoon or early evening.

The first dozen to bloom last season appeared as follows: Mibloom, Max Reger, Dr. Durr, Gold Eagle, J. S. Bach, Aida, Token, Lady Marie, Cara Mia, Miss Bloomington, Early Dawn and Mary Frey.

Among the newer varieties: Margaret Beaton and Zuni were outstanding.

Beacon attracted much attention, Jasmine is a dainty one, nicely ruffled, Lord Selkirk opens the most flowers. Purple Beauty is a welcome addition to that color. Uniac was much admired. American Commander to near Commander Koehl. Colossus and Aladdin were too short. Crystal is large and white. Flora Farmer was a disappointment. Josef Hayden was extra tall and nice. Myrna was tall and straight. New Era discouraging. Hildred had the longest flower head.
